Short description:

Wide 3D-printable head band

Description:

My wife wanted a wider headband than those available as 3D-models, so I designed this one. Printed it in red Ultimaker ABS and in glow in the dark PLA so far. Both seems to work. Glow in the dark is quite cool :-). They might come out a bit differently in shape and strength depending on type of plastic and printing settings. I printed with 100% infill which corresponds to 19 grams of plastic. For ABS I had fans off, platform glued with Tesa Easy Stick and front of printer covered. Rotate model and lay flat to avoid supports.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/headband-wide> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
