Short description:

Check out this neat little thalidomide molecule necklace I modeled up quickly. Prints great in 20ish minutes. Just add your own chain and you've got a cool new accessory.

Description:

<p>I printed mine with a brim, although you'll have to do some post-process work to get it ready to wear out on the town. As mentioned, add your own chain or other material to complete the necklace. Would make a cool gift for any friends that are bio or chem geeks!
</p>
