Short description:

Resonances limit your printer's speeds. Print this test part to see if you're going too fast.

Description:

The limiting factor for fast acceleration is not how fast your printer can go in a straight line, but how well it handles resonances. Print this part with one shell and 100% rectangular infill to see if resonances can make your printer lose steps. This design accompanies my speed tuning guide at: <http://youtu.be/7HslZuj9vOs>

If you can, please use the online documentation found at <http://www.youmagine.com/designs/resonance-test> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
