Short description:

If you have ever tried to remove your door trim it's likely you tried to pry it up from the wrong end and snapped off the front clip.

Description:

I designed the clip in Creo 2.0 and have included the design source file as well as an STL and STEP file. Installation Instructions:, *Use a knife and carefully cut off the old clip. *Use a needle nose pliers to pull in the walls of the aluminum posts. *Fit the new clip over the aluminum posts. *Use a screwdriver to expand the aluminum posts locking the clip in place. *Install your trim and bask in the glory of a successful repair.

If you can, please use the online documentation found at http://www.youmagine.com/designs/audi-b6-b7-door-trim-clip because those may have been been updated. Also, there you can interact and provide praise and/or feedback.
